Subject: Recommendation

It is my great pleasure to write this letter of recommendation for Mr. Anup Adhikari, whom I have known for four years. As a Campus Chief of Pashchimanchal Campus, Institute of Engineering, Tribhuvan University, I would like to appreciate this brilliant young person for his outstanding performance in the campus. I supervised him along with Electronics Department during his bachelor degree in this institution. During my contact with him, I found him an intellectual and enthusiastic student to learn without any hesitations. At that time, he had shown his keen interest in programming, embedded system design and control theory. Although he is dealing with many practical problems related to electronics, I feel he necessitates upgrading his knowledge in the respective field. His capability to learn, logical approach of solving problems and comprehensive learning in electronics indicate that he will be able to amplify the knowledge from the university he is going to apply. His career in information and computer industry is bright, since Nepal is dynamically progressing in telecommunication, mobile industry, embedded technology and software. Again, government organizations are quite enthusiastic to implement e-governance and fast/reliable services that our nation is in need.

Mr. Adhikari has better interpersonal skills and has been able to work independently or in a group. He has been such a wonderful combination of studentship and the social work. He displayed good leadership skills when he started **Skyne Creative Group**, an academic student group; different from existing political student groups. At start, they started a magazine named **ENSCITECH**, which contributed to spread engineering concepts to academics and public. Skyne Creative Group organized many programs like Students' Competition, Seminars, Presentations and various training programs for engineering students to strengthen their practical abilities and horizon of knowledge. I have been particularly impressed by his exemplary works in organizing mobile orientation programs in schools/ colleges of Dhaulagiri Zone about choosing right engineering to students. Hence he is a valuable personality in engineering field in Nepal.

He was also awarded **scholarship** during his undergraduate study. It is nice to hear that Mr. Adhikari is applying for "**Computer Science and Information Technology**". It's my great pleasure to write this recommendation letter for him. I am confident that the knowledge he will perceive from the competitive academic environment through his higher level of study will certainly be beneficial to the nation. I will be pleased to answer any additional questions you may have.

I wish him good luck in his future endeavors.

Sincerely,

Associate Prof. Er. Narayan Gautam
Campus Chief

Subject: Letter of Statement

Dear sir/madam,

Mr. Anup Adhikari, the permanent resident of Dhital VDC-8, Kaski, Nepal, has been working as ICT officer since past 24 months, supervising several ICT projects and systems inside the DDC-office and administrating district ICT infrastructures. Being one of the key functional officers in our office, he has been undertaking following responsibilities successfully.

- To bring transparency in DDC to the general public through information and services
- Digitization of DDC work plans and improve the fundamental services
- Addressing the requirements of e-governance in DDC and assess additional categories and describe them
- To increase the capacities in communication technology in district by the use of ICT
- Knowledge transfer to the recently graduated candidates in regards to information and communication used in Local Bodies

He is very intelligent person and I found him sincere on his work. The project works he was involved was concluded within the stipulated time. I found him very enthusiastic to learn from fundamental theories. As he is working on governance team, it has been quintessential to sharpen his skill as ICT officer and broaden up his knowledge in new development infrastructures relating computing and advanced data processing.

Being a governing officer for already more than 12 years and working in various positions in government body, I have always found the role of Information Technology a crucial aspect for governance. I would highly recommend his further study in modern computing envisioning e-governance, embedded designs and big data. He has a good interest in public reach to information and is quite enthusiastic to learn the magnetization of information through mobile means and devices. Therefore, we have been nominated him for further study which would definitely advance his technical knowledge as well as managerial skills to overcome the technical challenges we are facing.

Government of Nepal
Ministry of Federal Affairs and Local Development
Office of District Development Committee
Kushma, Parbat

This is a public organization dedicated for development of many projects and programs in social, cultural, intellectual and infrastructural models. There is always requirement of highly qualified manpower with adequate knowledge in modernization of social networks, efficiency of computers and mobile devices, and future developments. The knowledge gained by Mr. Adhikari will be a great asset to our organization and shall be directly benefited for detail design and coordination of team works.

After acquiring the knowledge and experiences of this course, we will be deputing Mr. Adhikari with greater responsibility as IT Officer for overall planning, designing and implementing supervision of many future projects. There will be a great influence on coordination, planning, decision making and execution of the works with limited time and budget after getting creative ideas and high technical skills.

We are happy to grant his educational leave for maximum of 2 years. We are happy to offer him responsibility of ICT Officer upon his return from the course.

Please feel free to contact us if there are any further clarifications.

Yours truly,

.....
Local Development Officer
